Product description

Indoor snack and beverage machine

TCN-CSC-10N(V10) Indoor Machine

The TCN-CSC-10N(V10) is a compact indoor vending machine for snacks, drinks and other products. With 10-inch touchscreen, adjustable cooling, drop sensor and MDB payment standard, this model is ideal for professional indoor sales areas.

Compact machine for indoor areas

The TCN-CSC-10N(V10) combines a clear product version with modern operation via a 10-inch touch screen. The adjustable cooling of 4 to 25 ° C allows the sale of beverages, snacks and other suitable products.

Thanks to the black, neutral housing without sticker, the machine can be integrated cleanly into different interiors, for example in offices, lounges, gyms, workshops, schools, hotels or sales areas.

Benefits at a glance

? 10-inch touchscreen for modern operation

? Adjustable Cooling from 4 to 25 ° C

? Advanced case sensor for reliable product output

? Tempered glass with defogging function against fitting

? International MDB Standard for Standard Payment Systems

? 6 levels with 10 compartments for flexible fitting

Flexible product output with spiral system

The machine works with classic spiral-coil trays and has 6 levels each with 10 compartments. Up to 60 product places are thus available. The fitting can be adapted depending on the range.

The model works without elevator system. The integrated case sensor detects whether a product has been correctly output and thus ensures greater operational reliability in the running automated operation.

Spiral configuration

Variant 1 (standard)

Level 1 Double spiral (105mm) – chips

Level 2 single spiral (38mm) – Vapes

Level 3-4 Single spiral (60mm) – Snacks

Level 5-6 single spiral (86mm) – drinks
