

antenna

This qualitative antenna improves the reception of vending machines and thus the connectivity to the Internet, giving you more freedom in location selection.

Item number UD10291

Weight 0.04kg

Height 315mm

Product description

ANTENNA FOR VENDING MACHINES– HIGH RANGE & STABLE CONNECTION

The **antenna** improves the communication performance of your vending machine and ensures **reliable signal transmission**. It increases the range in wireless network environments and ensures stable connections – even in demanding applications.

Product details:

- ? **Material:** Highly conductive metal for optimal signal quality.
- ? **Installation:** Plug-and-play connection for easy and fast mounting.
- ? **Advantage:** Increases the range and stability of the connection.

☐ dimensions:

Height: 31.5 cm

Cable length: 150 cm

With this powerful antenna you optimize the connectivity of your – vending machine for stable and reliable communication! ??
