Item number	UD10576
Weight	0.04kg
Width	16mm
Height	170mm

Product description

??COIN SLIDE FOR MACHINES– CONNECTION FROM INSERT TO COIN CHANGER

This precise coin slide made of sturdy plastic reliably leads the coins thrown in from the coin insert to the coin changer module. It is a central connecting element in the coin path and ensures a secure, precise guidance of the coins in the machine.

The construction with ventilation or recess openings prevents dirt accumulations and allows easy maintenance. The slide is optimally matched to the installation in the machine and can be fast and secure.

- ? **Material:** Robust design made of plastic.
- ? **Function:** Precise coin guide from the throw to the coin changer.
- ? **Compatibility:** Customized for machines with Wechsler module.
- ? **Maintenance:** Easy assembly and cleaning.
- ? **Design:** With openings for functional safety.
