The SenVend accessory set

Connectivity upgrade for your machines

No signal? No data? No revenue?**Stop it.**

With the SenVend accessory set you get everything you need to your machine smart and connected to make. This set is the bridge between your machine and the Cloud – optimized for telemetry and cashless payment.

What's in the package?

A complete "plug & Play" Kit consisting of:

- **Teltonika RUT200:**The robust industrial router for 4G/LTE connectivity.
- **Magnetic SMA antenna:**External antenna with magnetic foot – brings the signal from each metal housing.
- **Mobile SMA rod antenna:**Compact alternative for flexible assembly.
- **Power cable harness & Ethernet cable:**Everything for safe power and data supply.

Why you need it:

- **Stable connection:**Independent Internet, no matter where the machine is.
- **cashless numbers:**Binde credit card reader safe and fast.
- **Remote monitoring:**Send fill levels and sales figures in real time.
- **Problem Solventer:**The external magnetic antenna solves reception problems with shielded steel automatic machines immediately.
