

Pick Up Door Magnet for Machines with Lift (2pcs)

This sensor is distinguished by its exact measurement of the temperature in the machine. With the help of this sensor, the temperature in the machine can be easily monitored via the Internet.

Item number UD10627

Weight 0.01kg

Length 285mm

Product description

Magnet for lift output (pic-up door)

This special magnet was developed for vending machines with lift systems and secures the output door after a sale. It ensures that the door remains tightly closed until the product is removed from the customer.

The magnet is designed to enable reliable and precise locking of the pick-up door to prevent vandalism and unauthorized access. The stable holding force ensures that the door can only be opened when the control allows this.

Product properties:

- **Strong holding force:**Guarantees secure locking of the output door.
- **Compatibility:**Especially for vending machines with lift systems.
- **Durable materials:**Robust construction for daily use.
- **Reliable:**Secures the goods until the customer is removed.
