

Cooling system for TCN machines E-type

High-quality cooling system for vending machines, in which the temperature can be adjusted individually in a range of 4-25 ° C.

Item number	UD10667
Weight	33.6kg
Length	480mm
Width	520mm
Height	450mm

Product description

Cooling system for vending machines TYP E

Powerful cooling for fresh products. This unit is specially designed for TCN machines and ensures a constant temperature between about 4 to 25 degrees Celsius. Essential for the sale of food and beverages.

TYP D is usually used in machines with standard housings, while **Type E** usually used for machines with lower housings. How to distinguish the two versions: Use spring-loaded machines **TYP D** when the machine uses 450 mm screw springs; uses the machine 500mm screw springs, use **TYP E**.

OPTIMALE FRISCHE: Ensure the quality of your goods by reliable temperature control, even at fluctuating outside temperatures.
