Upgrade for your machine: The CPI Gryphon coin changer with 6 tubes, 3 motors & USB update. Maximum acceptance rate (>97%) & fewer service operations.

Item number UD10677

Weight 1kg

Product description

CPI GRYPHON™ COIN CHANGER– THE FUTURE OF CASH MANAGEMENT

[Manual](#)

Experience the next stage of coin processing with the **CPI Gryphon™**. As a successor to the proven Coin-Changer series, the Gryphon sets new standards in speed, safety and reliability. Designed by Crane Payment Innovations (CPI), this device offers the perfect solution for machine operators who want to minimize downtime and maximize sales.

Highlights at a glance

- ? **Next generation:**Market leader in speed, safety and detection accuracy.
- ? **Maximum capacity (6 tubes):**12% more exchange rate thanks to the 6-cube system.
- ? **High performance mechanics:**Three independent motors ensure quick payout.
- ? **Smart connectivity:**USB port for quick updates (80% less service time).

More capacity, less service costs

The outstanding feature of the Gryphon is its innovative **6-Tuben-Kassetten-system**. Compared to conventional 4- or 5-tube changers, the Gryphon offers up to **12% more capacity** for change.

Your advantage: You can use more flexible payout configurations and need to drive the vending machines more rarely to refill bills. This saves time and operating costs.

Technology that pays off

- ? **3-engine system:**Three independent motors ensure extremely fast payout and reduce the risk of coin locks to a minimum.
 - ? **Precise detection:**Adoption rate of **97 %**for the first throw and most modern sensor technology for maximum fraud protection.
-

Modern connectivity & Maintenance

End with complicated updates on site. The Gryphon has an integrated **USB port**, which revolutionizes firmware updates and data readings. It is also fully compatible with the common MDB standards.
