

Cable for the control board of the anti-theft flap, Baffle Plate Driver Board Cable

Replacement cable for the control board of the anti-theft flap (Baffle Plate Driver Board). Ensures the function of the goods output. Perfect for TCN machines.

Item number UD10698

Product description

Cable for control board of the anti-theft flap

Essential connection for your security technology. This cable (Baffle Plate Driver Board Cable) connects the control board to the mechanism of the theft protection flap in the output compartment. It ensures reliable signal transmission for opening and closing the goods output.

FUNCTION: A defective cable can cause the output compartment to not open or close. Restore the full function with this spare part.
