Height	1985mm

Product description

Outdoor snack bar

TCN-CSC-10C(H5) Outdoor Machine

The TCN-CSC-10C(H5) is a robust outdoor vending machine for snacks, drinks and other products. Due to rain roof, optimized water drainage, weather-protected components and integrated heating function, this model is particularly suitable for demanding outdoor areas.

Designed for outdoor use

Many simple outdoor models are equipped only with a rain roof, some sealing at the columns and a heating function. In addition to the rain roof, the machine has additional water drainage channels, sealed transitions, an HTC heating function and weather-protected structures in the area of the coin injection.

As a result, the machine offers better protection against moisture than simple outdoor designs and is suitable for locations where reliable operation in the outdoor area is required.

Benefits at a glance

? outdoor design with rain roof and improved water drainage

? Additional sealing by waterproof adhesive and sealing areas

? HTC heating function for more stable operation at low temperatures

? Tempered glass with defogging function against fitting

? Adjustable cooling of 4 to 25 ° C

? Advanced case sensor for reliable product output

? International MDB Standard for Payment Systems

? online inventory and sales system over 4G / WiFi

Flexible product output with spiral system

The TCN-CSC-10C(H5) works without elevator system and uses spiral coil trains. With 6 levels and 10 compartments per level, up to 60 product places are available. As a result, snacks, drinks and other suitable products can be flexibly placed.

The integrated case sensor detects whether a product has been output correctly. This reduces incorrect purchases and ensures a more stable operation in everyday life.

Spiral configuration

Variant 1 (standard)

Level 1 **Double spiral (105mm) – chips**

Level 2 **single spiral (38mm) – Vapes**

Level 3-4 **Single spiral (60mm) – Snacks**

Level 5-6 **single spiral (86mm) – drinks**

Technical data

Model	TCN-CSC-10C(H5)
Application area	Outdoor
Cooling	4 to 25 ° C adjustable
Glass	Tempered glass with defogging
Product system	Spiral coil trays
Capacity	6 levels, 10 compartments per level
Payment standard	International MDB Standard

Connectivity	4G / WiFi
Power supply	230 V, 50 Hz
Dimensions	approx. 1220 × 890 × 1985 mm
Weight	approx. 320 kg
Colour	Black, without stickers

Suitable applications

The machine is suitable for locations where products are to be offered outside classic interiors. It is particularly useful to use in heavily frequented places with regular customer base.

Service stations | Sites | Amusement parks | Railway stations | Campsites | 24/7 sales areas

Note to the list

The model is designed for outdoor use. For as long as possible, we still recommend a stable, flat mounting surface and – if possible – an additionally protected location.

Would you like to use an outdoor machine?

We will be happy to advise you on the appropriate automated solution for your location.
