Product description

Hot Food Machine

TCN-CFM-2N(V22) Hot Food Automat

The TCN-CFM-2N(V22) is a compact hot food machine for hot dishes, ready meals and snacks. With 22-inch touchscreen, integrated cooling, elevator system and independent microwave heating, this model is ideal for locations where hot meals are to be offered around the clock.

Warm food directly from the machine

This hot food machine combines cooled storage with automatic heating. Products can be stored refrigerated in the machine and heated directly after selection by the customer. This makes the machine particularly suitable for finished meals, hot snacks, bowls, pasta, sandwiches or other suitable to go products.

By using the large 22-inch Android touchscreen, the machine is modern and clear. Customers can easily select products and get a simple, digital user guide.

Benefits at a glance

? 22-inch touchscreen with Android system

? Integrated cooling from 4 to 25 ° C

? Independent microwave heating for hot dishes

? Elevator System for a gentle product output

? International MDB Standard for Matching Payment Systems

? storage capacity for up to 24 products, conveyor belts

Ideal for small hot food concepts

With its storage capacity of 24 products, the machine is particularly interesting for locations where a compact but high-quality hot-filling offer is required. The combination of cooling and automatic heating allows flexible fitting with different dishes.

The elevator system ensures that products are transported safely and controlled. The machine is therefore also suitable for more sensitive packaging and finished meals.
