Height	2275mm

Product description

Pizza delivery restaurant

Pizza Vending Machine

The pizza machine is for the automated 24/7 sale of freshly baked pizza. With freezer storage, powerful furnace system, intelligent remote management and short baking time, the machine is ideal for locations with high demand for fast, warm meals.

Fresh pizza at push of a button

The pizza machine keeps the pizzas frozen and automatically prepares them after the selection. The modern heating and baking system can be used to complete a pizza within a short time. This creates an attractive offer for customers who want to quickly buy a warm meal regardless of opening hours.

The combination of automated output, digital control and compact sales area makes the pizza machine particularly interesting for locations where classic gastronomy cannot be permanently occupied.

Benefits at a glance

- Short baking time of up to 90 seconds
- Freezer storage for up to 69 pizzas
- Suitable for 10-inch pizzas
- Oven temperature up to 350 ° C
- Remote management via Android app
- Automated 24/7 sales

Intelligent system for unattended operation

The pizza machine is designed for unattended operation. The management system can centrally manage relevant operating data and settings. This allows the machine to be efficiently controlled and integrated into existing location concepts.

The anti-Pinch function on the pizza output increases the security of the output. Depending on the configuration, different payment methods such as bank card, coins, cash or mobile payment solutions can be supported.
