Product description

Self-Service French Fries Vending Machine with Frying System & 32-Inch Touchscreen

The Self-Service French Fries Vending Machine is an automated solution for selling hot snacks such as French fries, chicken nuggets, chicken wings, chicken legs, onion rings and other frozen products suitable for deep frying. Customers place their order directly via the large 32-inch touchscreen.

With a capacity of up to 120 boxes, two frying baskets, two oil pans and integrated refrigeration, this machine is ideal for food courts, shopping malls, amusement parks, cinemas, train stations, events and vending stores.

Automated hot snack preparation

Automatic deep frying: The machine works with frozen food products and prepares them using a deep-frying process.

Fast serving: Frying time is approx. 2-5 minutes, depending on the selected product.

Key benefits

32-inch touchscreen: Large user interface for easy product selection

High capacity: Up to 120 boxes inside the machine

Flexible product range: Suitable for fries, nuggets, wings, onion rings and other deep-fry frozen products

Integrated refrigeration: Cooling system with approx. -3 °C storage temperature

Sauce dispensing: Up to 180 individually packed sauces, optionally free or paid

Frying and refrigeration system

The machine is equipped with two frying baskets and two oil pans. Each oil pan has a capacity of 10 liters, with a recommended operating fill level of approx. 5-7 liters per pan.

The oil temperature limit is 180 °C. After approx. 200 frying cycles, the oil should be replaced and the machine cleaned. The oil pans and selected accessories can be removed for manual cleaning.
