Flower vending machine with 6 refrigerated lockers, 21.5" touchscreen, outdoor enclosure & roof. Cooling 4–20 °C, Nayax, cloud management. Enquire now.

Item number UD10874

Product description

Flower Vending Machine with 6 Refrigerated Compartments & 21.5" Touchscreen – Outdoor

The **flower vending machine with 6 refrigerated lockers** sells bouquets, roses and arrangements around the clock – in front of the flower shop, at the nursery, at the cemetery or at the train station. Six large compartments with transparent acrylic doors present the goods like a shop window, and the 21.5-inch touchscreen guides customers through selection and payment.

The outdoor version includes a three-sided metal enclosure with an illuminated light box and a roof cover, so the machine can stand outdoors protected from the weather. Cooling from 4 to 20 °C, electrically unlocked doors and glass heating against condensation ensure fresh flowers and a clear view – 24/7 without staff.

Shop window, fridge and checkout in one machine

Each of the six compartments is a separate refrigerated locker with electric locking. The customer selects on the touchscreen, pays by card or cash, and the chosen compartment opens. Flowers are not transported or dropped – they stay undamaged in the compartment until the customer takes them out.

With cloud management you can see in real time which compartments are filled, what has been sold and whether the cooling is running – from your phone or PC, without being on site.

Benefits at a glance

6 refrigerated lockers: approx. 45.6 × 43.2 × 47 cm each – room for large bouquets, arrangements or potted plants

Outdoor-ready: three-sided metal enclosure, light box and roof cover included

21.5-inch touchscreen: product images, prices, advertising and shopping cart

Cooling 4-20 °C: with energy management and glass heating against condensation

Cloud management: real-time stock, sales data, remote control of cooling and lighting

Cashless payment: Nayax card terminal, optional coin acceptor and banknote validator

Capacity & design

Refrigerated compartments: 6 lockers, electrically locked, metal frame with transparent acrylic door

Compartment size: approx. 456 × 432 × 470 mm (W × D × H) each

Control unit: touchscreen column with additional storage shelves for accessories and refills

Technology: locker dispensing – no spirals, no lift, no damage to the goods

Dimensions & weight

Machine without outdoor enclosure: approx. 1660 mm wide × 710 mm deep × 1990 mm high

Outdoor enclosure: three-sided metal enclosure with light box, delivered in parts and assembled on site

Roof cover: included in the outdoor version

Weight: on request

Note: The external dimensions with mounted outdoor enclosure and roof differ from the machine dimensions. Please contact us for site planning.

Technical data

Model: WM22-G with outdoor enclosure WM22-W

Display: 21.5-inch touchscreen

Operating system: Android 11, 16 GB ROM / 2 GB RAM

Connectivity: Wi-Fi, 3G/4G (SIM card), LAN

Protocol: MDB / RS232

Cooling: 4-20 °C, energy management module

Doors: tempered glass front, electric glass heating, LED light strips

Locking: electric door locks per compartment

Colour: white or black

Power supply: 220-230 V / 50 Hz

Warranty: 12 months

Actual power consumption depends on ambient temperature, sun exposure and usage. [To the energy cost calculator](#)

Equipment & options

Light box: illuminated advertising space on the outdoor enclosure

Advertising display (optional): 43.9-inch screen on top of the machine, playback via USB stick, 3 mm tempered glass

Receipt printer (optional): receipt after purchase

Custom wrap (optional): full wrap in your own design

Installation: indoor and outdoor (with outdoor enclosure)

Software & remote management

The machine runs on Android 11 with cloud-based management. Stock, sales and temperatures are available in real time, prices and advertising are managed remotely.

Shopping cart: Buy several compartments in one payment – e.g. bouquet plus greeting card

Quantity discount & promotion: Discount from 2 or 3 products, recommended products before payment

Product details: Image and description for each compartment, just like an online shop

Remote control: Upload advertising, switch cooling and lighting remotely, sales statistics, sub-accounts

Updates: Remote software updates, support via video call

Payment systems

At least one payment option is required for operation. Depending on the location, the machine can be equipped with cashless payment, a cash system or a combination of both.

Cashless payment: Nayax card terminal (debit card, credit card, Apple Pay, Google Pay)

Cash payment: optional coin acceptor (ICT) and banknote validator (ITL NV9 / NV11 with change)

Fee notice: Depending on the contract, cashless payments incur transaction costs and monthly fees

Suitable products

The refrigerated compartments keep cut flowers fresh and allow 24/7 sales – even on Sundays and at night.

Bouquets, roses and single flowers

Potted plants and small arrangements

Greeting cards, vases and gift items (ambient or additional compartments)

Chocolates, wine and gift boxes (as a combo with the bouquet)

Typical locations

Florists & flower shops – 24/7 sales in front of the shop

Nurseries & farm shops

Cemeteries & churches – grave decorations outside opening hours

Train stations, petrol stations & supermarkets

Hospitals, hotels & shopping centres

Note on outdoor installation

The outdoor enclosure is delivered in parts and assembled on site. Before installation, check the power connection, a level surface, weather protection against the prevailing wind direction, ventilation of the cooling system and access for refilling. Direct sunlight increases the cooling demand.

Sell flowers – around the clock

Six refrigerated shop-window compartments, touchscreen and card payment: sell bouquets after closing time, on Sundays and on public holidays – without staff.
